

PreSoak & Foam Systems

Some Items Built to Order - Call for Availability

PreSoak Systems

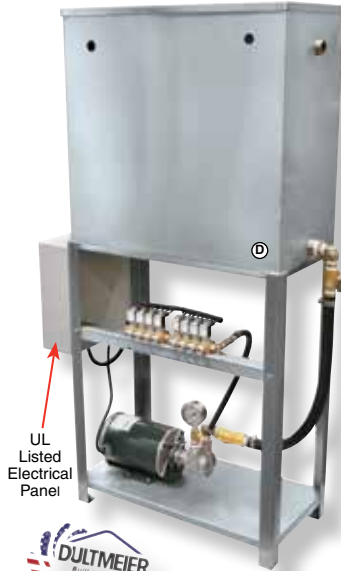

Increase bay revenue and keep customers satisfied with a PreSoak System from *Dultmeier Sales*. Use as an addition to or in place of foaming brush systems for extra cleaning ability.

Dultmeier Sales PreSoak Systems are designed to apply a concentrated cleaning product under medium pressure to the surface of a vehicle.

Easily adapts to your existing car wash equipment. Simply tap into your high pressure line to each bay and apply PreSoak Cleaner through your standard spray gun.

Standard Components Include:

- Stainless Transfer Pump delivers 180 PSI.
- Automatic Stainless Steel Mixing Tank with Hydrominder Mixing Valve.
- Stainless Steel Solenoids with Metering Screws.
- Pre-wired Electrical Panel.
- U.L. Rated.
- Chemical Tank.
- Stainless Steel Support Frame with leveler legs.
- High Pressure Check Valves for each bay.
- All necessary Tubing and Fittings.
- **Start-Up PreSoak Pail.**

Part No.	Pressure	No. of Bays
DU PS1-HP	180 PSI	1
DU PS2-HP	180 PSI	2
DU PS3-HP	180 PSI	3
DU PS4-HP	180 PSI	4
DU PS5-HP	180 PSI	5
DU PS6-HP	180 PSI	6
DU PS8-HP	180 PSI	8

Foaming PreSoak System

From Dultmeier Sales! Foaming PreSoak System for added revenue. Customers love the way the presoak covers the entire vehicle with rich foam that clings and helps to clean away dirt. This is a separate system much like a brush system. Product is applied through a separate wand assembly and does not run through the high pressure pump lines.

Standard Features Include: Stainless steel stand and tank • Close-coupled pump/motor unit • Hydrominder valve for automatic mixing • Startup chemical • Coil bay hoses with spray wands • Stainless steel wand holders • Supply tubing and fittings • Pre-plumbed and Pre-wired • **Start-UP PreSoak Pail.**

Foaming Tire & Engine Cleaner Systems

Centrifugal Pump Design

Keep your customers in the bays longer, increase revenues and improve customer satisfaction with a Foaming Tire & Engine Cleaner System from *Dultmeier Sales*.

Easily adapts to existing wash equipment. Simply splice into your high pressure discharge lines & tire cleaner product can be applied through a standard spray gun. All fittings and tubing are supplied for chemical and air lines.

These systems are designed to "Foam" the tire cleaner product onto the surface of the tire. An air compressor is required but is not included with these units. All Tire & Engine Systems are Pre-Wired, Pre-Plumbed and tested prior to shipment.

UL Listed Electrical Panel

Standard Components Include: Stainless Steel Close-coupled Centrifugal Transfer Pump • Start-Up Tire Cleaner Pail • Automatic Stainless Steel Holding Tank • HydroMinder Mixing Valve • Stainless Steel Solenoids with Metering Screws • Pre-Wired Electrical Panel • Stainless Steel Support Frame with leveler legs • High Pressure Stainless Steel Check Valves for each bay • Foam Modules for each bay • All necessary Tubing and Fittings.

Multiple Product Foam Systems

These systems are designed to mix and distribute (3) different products in self-serve bays. Ideal for use with Presoaks, Bug Cleaners, Tire Cleaners, Clear Coat Protectants, Foam waxes, etc. Three, mix and transfer systems in one compact unit. Eliminates the need to have (3) separate systems which lessens space requirements. **Note: Chemical Products Available, But Not Included.**

Standard Features Include: Automatic mixing tanks • Air regulators with gauges • Stainless wall rack • Stainless bay booms • Run tubing with fittings • Foam modules • Air diaphragm pumps • Foam wands with holders • Pre-plumbed, pre wired and ready for use • Dimensions are 18" deep x 30" wide x 48" high
