

Little & Big Two-Timers

GT200

IDXTwo-Timers display coins deposited, time remaining and 72 letter welcoming message. The 2-Time feature also allows for different time/price options at different times of the day. Bonus time for large coin startup and X-tra time feature that allows for additional coins to be deposited for 20 seconds at the end of the cycle are also standard features.

GT200 Little Two-Timer is designed to fit into existing meters. Fits common face lid openings with studs. Letters are 3/4" high. Overall size is 3.8" x 3.4" x 3.1". Poly carbonate case is standard. **Warning horn is not included but can be ordered separately.**

IX GT200	Little Two-Timer.....
IX LC525	24V Horn as option for GT200

DIXMOR Digital Readout Timers

LED6
(Bracket Mount)

LED7 (Stud Mount)

Keep your customers satisfied with Digital Readout Timers. Red L.E.D display shows continuous countdown of time from start to finish of cycle.

All timers feature a 20 second "courtesy" period to add another coin after time has run out. Timers are adaptable to most any coin mechanism. Accumulating feature allows coins to be added at any time during the time cycle or "courtesy" period. All timers are 24-volt input and accumulate up to 99 minutes of total time. Standard with 1/4" Lexan cover plates for extra protection. **Warning horns are optional if required.**

Available Models:

LED6 Meter Timer is a retrofit for replacement of TM5 "Time Master" timers. Bracket mount.

LED7 Meter Timer is 3-1/4" H x 3-1/4" W x 2-1/2" D and can be mounted into most existing coin meters. Messages can be in English or Spanish.

LED3 & LED5 in Coin Meter

Standard Features: Programmable scrolling messages to greet and thank customers • 1-20 coins to start • 1 to 10 minutes per coin • Built-in resettable counter for inventory check • Built-in self-charging battery if power fails • Easily programmed with only 2 buttons.

DX RS1	Warning Horn Only as Add-On
DX RC1	Control for Remote Programming

TimeMaster Countdown Timers

TimeMaster Countdown Timers feature a blue/green fluorescent display for maximum visibility. This color reduces the washed-out effect that sunlight has on red displays. Timers are housed in a water resistant, high impact plastic case. All units feature a wing nut to attach timer to existing meter lids.

Timers will start on 1-20 coins and will accumulate up to 100 coins if desired. Time settings are from 1 second to 99 minutes per coin.

TM5J

TM5J Timers can be used in 24-volt bay or vacuum applications. Besides the countdown feature, it also includes a "grace period", last minute alert, bonus time and "change-over pause" feature for low pressure functions.

RC1T
Remote Control

Program messages can be set by switches on the units or by the **RC1** remote control. All program memory is retained in case of power failure.

Dimensions: 3" wide, 1-3/4" high, 3-3/4" deep. **Input voltage** is 24 volt, AC

RS1
Horn
Included

DX TM5J	Digital Timer With Horn.....
DX RS1	Warning Horn Only, as Replacement
DX RC1T	Control for Remote Programming & Accounting.

Tokens

These tokens are high security, 85/15 copper construction. Since this copper ratio is higher than the more common game arcade tokens, your coin mechanisms can be set to only accept this car wash ratio, which protects you from unwanted cheaper tokens. Stock size is .984". Token use can help to eliminate theft and vandalism. Sold in bags of 500 tokens. (Other sizes also available. Custom tokens also available).
