

Backed by 5-Year Service Program for Pumps Shown Below

**EPDM vs. Viton® Seals**

- Many Agchemical Manufacturers recommend EPDM seals for most of their products.
- Also use EPDM pump seals for Roundup™, Glyphosate, Dicamba, Lumax™, Lexar™, Callisto™ & Halex GT™.
- Use Viton® pump seals for petroleum-solvent based products, nitrogen based products and N-Serve™.
- You should also check Manufacturer's Product Data Sheets for guidance on compatible seals.

**SCIENCO**  
**CT6 Basic Kits**

These **CT6 Diaphragm Pumps** are designed to transfer agchemicals at up to **13-14 GPM. High Flow (HF) Pumps** provide **17-18 GPM.**

12 Volt units have 20', 10 gauge cord with 30 amp inline fuse and switch. (6' Cord on 115 volt units).

**CT6 AgChemical Pump Kits for Cage Tanks**

These high flow diaphragm pumps are designed to transfer agchemicals at up to **13-14 GPM.**

**CT6 Kits Include:** CT6 pump with bracket to secure to cage tanks, suction hose with 2" female camlock, discharge hose, SEM10FT or SEM10FTE hose end meter and nozzle valve.

12V Units include 20' cord with inline fuse and switch. 115 Volt motors include 6' cord/plug.

"MP" Version includes 3-way discharge valve and drop tube/tank mixing eductor.
