Protective Safety Wear

TYVEK™ and **TYCHEM™** High Density Polyethylene **Safety Wear** is chemical resistant, light weight and has excellent abrasion resistance. One-piece garments are breathable to let body heat out while preventing chemical particulates from getting in. Disposable but tough enough to use more than once. Commonly used as protection against aerosols, oils, grease, fertilizers, pesticides and a wide variety of other chemicals.

1015XL TYVEK® Coverall without hood features full front zipper. Rated for light liquid splash of paints, oils and grease as well as hazardous dry particles. Size is XL. Color is **White**.

1058XL TYCHEM® QC Coverall includes hood and full front zipper. Rated for hazardous dry powders and solids as well as light chemical splash. 10-mil. Size is XL. Color is **Yellow**.

4015XL TYCHEM® SL Coverall includes hood and full front zipper. Rated for same chemicals as QC above, but 13-mil rating gives a higher level and duration of protection. Color is **White**.

527 TYVEK® Apron with full length sleeves and open back. Same rating as 1015XL above. Size is 30" x 40".
