

Stock Tank Heater

M66B Automatic Gas Tank Heater for LP-Gas.
 • AGA listed automatic safety controls • Easy and safe to light • Stays lit when others fail • Adjustable brackets fit steel, wood or concrete stock tanks • 12,470 BTU every hour if needed • No gaskets to melt or leak • No castings to crack or break • Heavy steel casing that will last • Control and burner assembly easily removed for servicing • Field tested and proven in all types of weather • Warm air around lowered control valve eliminates freeze-ups and sticky valves • Includes propane hookup kit.

AUTOMATIC LP GAS No. M66B		
Width	Height	*Length
8-1/2"	35"	20"
* Casing & Heat Chamber		

Part No.	Description	Wt.
TR 66B	Automatic Gas Tank Heater	50 lbs.

Robertshaw Control for Stock Tank Heaters

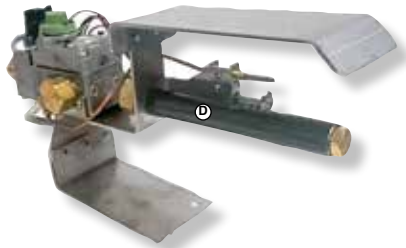

Robertshaw Complete Burner Assembly is the finest FULLY AUTOMATIC temperature control for 66B stock tank heaters • Automatically keeps water in stock tanks at the ideal temperature all winter • Provides accurate automatic control of water temperature without outside electrical connection • Contains thermomagnetic type of automatic pilot to insure positive shut-off of all gas in instances of pilot outage • For LP Gas • Includes propane hookup kit.

Part No.	Description
TR 15467	Complete Burner Assembly.....

Livestock Water Heater Control

A Universal Heater with a Completely Automatic Control

Trojan AG82 lowers your heating costs! No more gas than necessary to keep the trough ice-free. Has a rubber hose connector that allows you to position this unit in your waterer to get the right amount of heat for the hog trough and cattle trough in relation to animals drinking.

Features: Adjustable automatic thermostat • Safe lighting fully protected pilot • Sturdy construction and compact size • Wide base that prevents tip-overs • 4060 BTU every hour if needed • For LP Gas • Includes propane hookup kit.

Part No.	AUTOMATIC GAS BURNER	Wt.
TR AG82	With Automatic Control	4 lbs.

Electric Space Heater

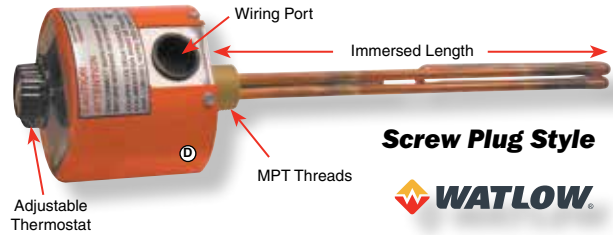

Part No.
TR A2520

Features: For Number 70 Hog Waterers, pipeline waterers or any enclosed watering unit • Adjustable, automatic thermostat • 450 watt tubular heat element • High quality sturdy construction.

Screw Plug Immersion Heaters

— Commercial / Industrial Grade —

Commercial Grade, Screw Plug Heaters are intended for direct immersion to heat a variety of fluids to specific temperatures. The heater element is designed to be installed into a female threaded port in an existing tank or vessel.

Available in different materials for a wide variety of heating applications with or without thermostats.

Units shown feature general purpose, indoor rated housings with adjustable thermostats for 30° to 250° F. control temperatures. (Outdoor NEMA 4 or Hazardous NEMA 7 housings are also available on special order).

Voltage ratings are single phase, 120 volt or 120/240 volt as shown. (3 Phase available). UL and CSA rated.

Steel or Incoloy sheath elements are available with 1", 1-1/4", 1-1/2" or 2" Male NPT threads (Stainless is also available).

Common sizes are shown, but immersed length, wattage and volts can be made in most any configuration to meet your needs. (Non-stock models are special made to order and are non-returnable).

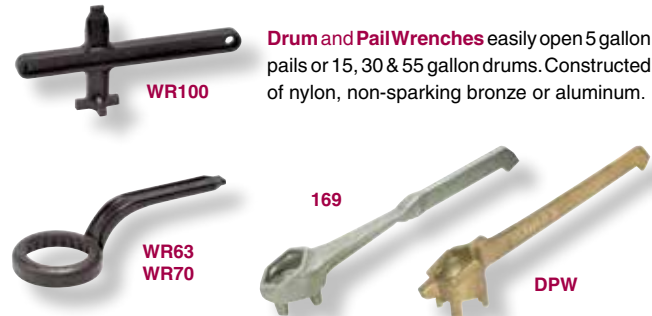

MATERIAL OPTIONS:

Steel Sheath, Steel Plug:	Fuel oils, hydraulic oils, degreasing solutions and other non-corrosive liquids.
Incoloy® Sheath, 304SS Plug:	Caustic solutions, degreasing products, process water and cleaning solutions.

Part No.	MPT		Volts	Watts	Immersed Length
