

NEW Ultra-Containment Berms

Portable Spill Containment Berms are ideal for the capture and protection of spills or leaks in buildings, structures, storage sheds or anywhere spill protection is needed.

Designed to capture leaks, drips and spills from Drums, Pails, Totes and Tanks.

Portable and easy to set up and take down as needed. L shaped aluminum brackets slide into external pocket sleeves to provide sturdy 12" sidewall support. Berm sides can be taken down as necessary if vehicles need to be driven into the berm to load or unload containers.

Berm material is 30Mil, Copolymer 2000 and is rated for temperatures from -25° F. to +160° F. Meets SPCC and EPA container storage regulation 40 CFR 264.17. *(Common sizes are shown but many other configurations are available).*

Compact shipping and storage
- with frames removed, Berm
requires very little space
(6' x 6' unit shown)

Part No.	Size	Containment Capacity	Wt.
UT 8251	6' x 6'	269 Gallons	29 lbs.
UT 8252	10' x 10'	748 Gallons	57 lbs.
UT 8270	10' x 20'	1496 Gallons	88 lbs.
UT 8274	12' x 12'	1077 Gallons	70 lbs.
UT 8276	12' x 30'	2692 Gallons	144 lbs.
UT 8277	12' x 40'	3590 Gallons	185 lbs.
UT 8281	15' x 30'	3366 Gallons	165 lbs.
UT 8282	15' x 40'	4448 Gallons	212 lbs.

Hose Trolley System

Dual Cable Trolley System for wash bays. Keeps hoses from dragging and free moving to eliminate kinking. No booms are required. Reduces hose damage and increases worker safety. System includes (8) trolley units along with enough galvanized cable, cable clamps, turnbuckles and wall eyebolts for up to 100' on each side of the vehicle. Hose trolleys ride on the cable for free movement back and forth in the bay. *(Hoses are not included).*
