RT CAW250C	250	3X72; 3X51	143 lbs.

Ace Roto-Mold

Septic & Cistern Tanks

Ace Tanks are stronger, easier to install and less costly than old-fashioned concrete septic tanks - yet they still offer the quality construction and safety you expect. Manufactured from high-density polyethylene with U.V. inhibitors, *Ace Roto-Mold* tanks utilize a horizontal flow designed for below ground installations up to 36 inches. *Ace Roto-Mold* Tanks are IAPMO approved and have passed strenuous stress tests. Each tank carries an individual serial code and is fully documented from date of manufacture.

Features: Withstands up to 500 PSF load pressure • Exclusive deep rib design • Unique locking/gasket lid design • 1.7 S.G. Rating.

Septic Tanks are designed and manufactured with rigorous quality controls to meet wastewater treatment system standards. The trapezoidal, deep rib design and exclusive interior divider system make these tanks the industry choice for strength and durability. The exclusive, custom-molded gasket system locks lids firm for a water-tight seal.

Cistern Tanks are intended for bulk storage or collection of potable water. Tanks are manufactured from high-density polyethylene with U.V. inhibitors and feature the same heavy-duty rib design and locking lid system as septic tanks.

AST1250

Ace Roto-Mold

AST1450-1W

Interior Divider

Ace's exclusive interior divider provides added strength, versatility and ease of installation. Slows wastewater flow and directs it to the middle of the tank where wastewater can separate from solids. (Only on two-compartment septic tanks.)

SEPTIC TANKS

Part No.	Capacity	Wt./Lbs	Dimensions
