

# Wash/Spill Containment Berms

## Wash/Spill Containment Berms

— Foam Wall Style —

**Containment Pads** easily catch and hold wash water or spills and leaks from vehicles. Ideal for use when washing trucks, trailers, vans or service vehicles where waste water capture is required. Simply unfold and use, no set-up is necessary. 4" High foam sidewalls temporarily compress when driven over. Waste water can be easily removed with a standard sump pump and transfer hose. Built-in handles help with the setup.

Standard construction is 22 oz. (24 mil) PVC which is designed for smooth surfaces. 18.5 oz. underlay ground tarps are recommended when pads are used on rough surfaces. Copolymer 2000 material is a heavier 28 oz. (32 mil) material and is also a better choice for some harsher chemicals.

Pad/Berms can be used for wash water capture as well as to capture liquid spills if necessary. Meets SPCC and EPA container storage regulations 40CFR 264.175. Standard color is black. Made in the USA. (Othersizes and 42mil PVC are also available - Call for Details).

### Trailer Wash Out Mat

A Portable, Reusable System to Capture Waste Water at the Back of a Truck Trailer

Foam Side Walls Temporarily Compress When Driven Over
