

Truck / Bus Wash Booms

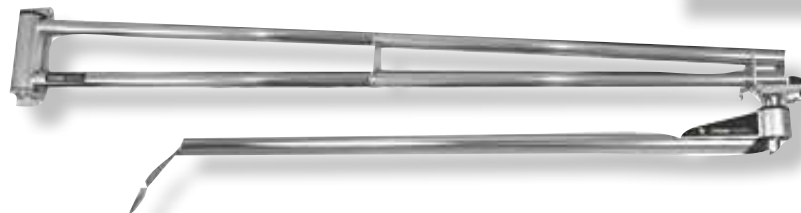

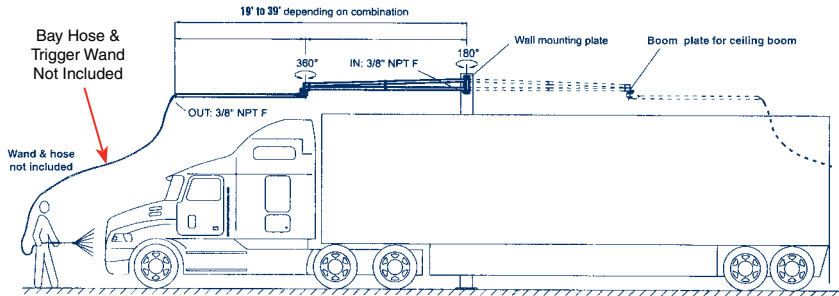

Wall Mount, Stainless Steel Booms for extended reach up to 78'. Two-piece assemblies are made up of a 180 degree wall boom extension and a 360 degree ceiling boom. The **E38** unit will effectively cover 78' (39' in each direction) and allow washing without moving the vehicle. Water inlet to boom extension is 3/8" FPT. Booms come with internal boom hose and 3/8" swivels rated to 4000 PSI.

Wall Boom Extension

- Smooth, Comfortable Operation
- Extended Work Radius
- Solid Construction

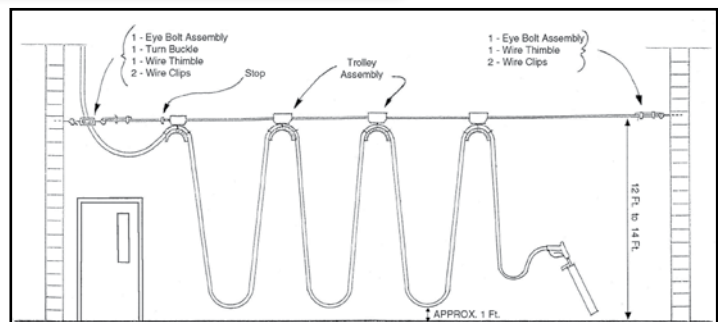

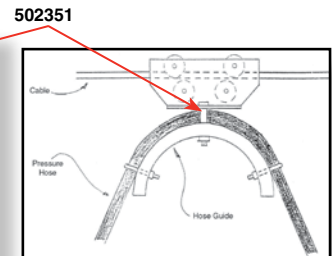

Whenever extended lengths and maximum flexibility are required, the wall boom extension is perfect for the job. Prime examples are truck wash bays, mining facilities, air craft maintenance and manufacturing plants. When combined correctly, a working radius of 39' is possible.

Part No.		Length	Wt.	
MM E20	Stainless Truck Boom	18' 10"	89 lbs.	CALL for PRICING
MM E25	Stainless Truck Boom	24' 7"	141 lbs.	
MM E30	Stainless Truck Boom	28' 8"	154 lbs.	
MM E38	Stainless Truck Boom	39'	167 lbs.	

Hose Trolley System

Dual Cable Trolley System for wash bays. Keeps hoses from dragging and free moving to eliminate kinking. No booms are required. Reduces hose damage and increases worker safety. System includes (8) trolley units along with enough galvanized cable, cable clamps, turnbuckles and wall eyebolts for up to 100' on each side of the vehicle. Hose trolleys ride on the cable for free movement back and forth in the bay. (Hoses are not included).
