

## Credit Card System & Tap To Pay System

A simple and economical way to accept Credit Card payment in your bays, vacuums, auto cashiers, pet washes or vending machines.

Cryptotap Plus is a contactless EMV reader that allows acceptance payment from Credit or Debit Cards. Also works with mobile payments including Apple Pay, Google Pay, Samsung Pay and others.

- Stand only unit connects directly to timers.
- Compact footprint
- All transactions are EMV
- Built-in QR reader
- Color LED surrounds unit with unique lighting
- No wireless fees, no minimum quantities
- External button is included for adding time credits or stopping "count up" cycle

- **CryptoPay Credit Card Encryption**
- **Wireless Card Readers**
- **Transaction Consolidation**
- **Affordable & Easy-To-Install**
- **Fleet Customers**

- **Cloud-Based Analytics & Receipts**
- **Low Start Up Cost**
- **No Minimum Card Reader Purchase**
- **Live Technical Support & Much More!**

### Simple.

This single CryptoNet Coordinator supports all of our POS units and simply connects to your internet service.

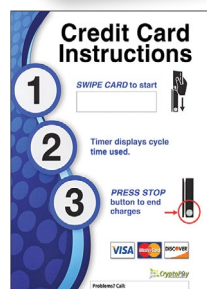

### All in One.

Every CryptoPay swiper & tap combines the power supply, control and CryptoNet technology electronics into a single unit.

### CryptoPay Accepts These Cards
