

HYPRO® 2410 Express Boom Assembly

Hypro's 2410 Express Boom Assembly allows you to customize each boom section by choosing the quantity of nozzle bodies either left or right of the tee for each section. Express Boom Assembly has the flexibility to meet any boom design. These single section custom configurations can range from one nozzle body on the left and/or right branch, to five nozzle bodies on each branch. Review the chart below for all configuration options.

Features:

- Standard Configuration 1" Sch 5 SS Pipe. 20" Spacing. Express Fittings, 5-way ProFlo Nozzle with EPDM 8 PSI DCV.
- Simplifies Manufacturing Process, Assembly Time and Product Numbers.
- Performance Tested to 150 PSI Rating.
- A Complete Assembly to Eliminate Any Assembly Defects.

Choose Left Branch	Choose Right Branch

HYPRO® Express Boom Fittings Eliminates the Shut-Off Lag Time

Developed to eliminate the shut-off lag time that can result in 70 ft. of overspray. The **Express End Cap** allows the compressed air trapped in the boom to bleed out, resulting in a much faster managed shut-off. You can easily retrofit 1" stainless, aluminum and poly pipe booms.

7433-2503
1" Express Fitting x 1" Flange

7433-3316
Standard Flow End Cap Assembly

7433-2502
1" Express Fitting x 1" Straight Flange

7433-2610
1" Express Fitting x 1" HB Elbow

7433-2608
1" Express Fitting x 1" HB Straight

7433-3319
Flush Valve for End Cap

7433-2613
1" Express Fitting x 1" Male Cam Lock Straight

7433-2514
Cleanout Plug, O-ring & Retainer Kit
