

Gas Engine Pressure Washers

Belt or Gearbox Drive - 2 Wheel Carts

Gas Engine Pressure Washers with pulley or gearbox driven pumps. **Belt/Pulley Driven Models** allow pumps to run at slower RPM for longer life. **Gear Box Models** allow for pumps to be direct driven but also at slower RPM. Either style is the best choice for contract cleaners or where units will be used most every day.

PM8000G
Belt Drive
 (Aluminum Cart)
4 GPM @ 4000 PSI

Standard Features Include: Triplex Plunger Pumps • Adjustable pressure regulators • Trigger style shut-off wands • Chemical injectors • 50' hoses • Flatt Free • Pneumatic tires • Aluminum or powder-coated frames as noted • Rope pull or 12 Volt starters on engines as noted.

EG3020HCP
Gear Drive (Aluminum Cart)
3 GPM @ 2000 PSI

PM8000GE
Belt Drive
4 GPM @ 4000 PSI

PM8700G
Powder Coat Cart

Belt Drive - Wired to Electric Start - Battery Box Included - But No Battery

6-Gallon Remote Fuel Tank Included

External Fuel Tank
