

Pulley & Gear Design - 2 Wheel Carts

Gas Engine Pressure Washers with pulley or gearbox driven pumps. **Belt/Pulley Driven Models** allow pumps to run at slower RPM for longer life. **Gear Box Models** allow for pumps to be direct driven but also at slower RPM. Either style is the best choice for contract cleaners or where units will be used most every day.

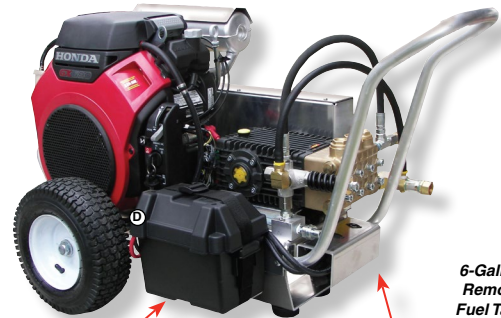

PM8000G
Belt Drive
(Aluminum Cart)
4 GPM @ 4000 PSI

50 ft. Hose

Standard Features Include: Triplex Plunger Pumps • Adjustable pressure regulators • Trigger style shut-off wands • Chemical injectors • 50' hoses • Pneumatic tires • Aluminum or powder-coated frames as noted • 12 Volt starters on engines as noted.
