Overhead Valve Engines

HONDA
ENGINES

**Recoil & Electric Starters
HORIZONTAL-SHAFT**

TX Series - Ideal for use as a Replacement Pump Engine

OHV Style. All Honda standard features plus transistorized ignition system, dual oil fillers, rewind starters, bottom intake air cleaner and oil alert feature.

GX390 11.7-HP SERIES (389cc)

The largest of Honda's single cylinder industrial engines. All standard Honda features plus CDI ignition with electronic advance, oil alert feature and automatic decompression release. Fuel tanks are 7.4 Qt.

Crankshaft: 1" diameter tapped 3/8-24 UNF with keyway.

GX390K1QA Standard Model: With rewind starter.

GX390

HONDA
ENGINES

4.8-HP GX160 Series (163cc)

GX160K1QXE: Same as GX160K1QX except with electric start.

GX160K1TX: Pump Engine has a 5/8"-18 threaded shaft and mounting flange for use with close-coupled Centrifugal pumps.

5.5-HP GX200 Series (196cc)

GX200QX2: Has a 3/4" O.D. Keyed shaft, drilled & tapped 5/16"-24.

CRX208CC

CRX208CC: 5.7HP / 208cc • Single Cylinder • 3/4" solid shaft • Dual element air cleaner • Low oil shutdown • .7 gallon fuel tank capacity • Recoil start.

CRX420CC: 12.1HP / 420cc • Single Cylinder • 1" solid shaft • Dual element air cleaner • Low oil shutdown • 1.6 gallon fuel tank capacity • Recoil start or 12-volt start with 18 amp alternator.

NH3 Control-Metering Systems with Heat Exchanger

45 GPM & 70 GPM

High Capacity, 1-1/2", 45 GPM NH3 Control-Metering Systems with Heat Exchangers. These kits come complete with heat exchangers, mounting brackets, control and shut-off valves and all required plumbing. All that's required is a controller and wire harness. Includes 1-1/4" full port, 120 degree control valve that increases your accuracy more than typical 90 degree control valves. Twin 1-1/4" valves also provide excellent accuracy and control at low rates as well as high rates.

Standard Features

- 45 GPM 1-1/2" System Complete with valves, forged steel fittings & mounting brackets.
- Heat Exchanger Includes Stainless Inner Tubes & Bonnets.
- Inlet Y-Strainer & Stainless Steel Ball Valve Included.
- 12-Volt Control & Shut-Off Valves with KZ Motors (Two Valves System Provides Optimal Accuracy).
- Heat Exchanger can be disassembled for Easy cleaning & maintenance.
- 1-1/2" Stainless Flow Meter (Sold Separately on LM Systems).
- Preassembled for Easy Installation.
- Systems with Meters Include Raven Stainless Meter.

RAVEN INDUSTRIES

AccuFlow™ Vortex System

Maximize levels of performance with the Raven AccuFlow™ Vortex cooler. The AccuFlow™ uses super cooling technology to stabilize NH3 as a liquid for superior accuracy and control. This pre-assembled system is the epitome of time savings. The AccuFlow™ Vortex allows you to apply more anhydrous at faster speeds and cooler temperatures, with less weight on the toolbar.

Other Key Benefits:

- Single or dual valve systems.
- Capable of up to 8 Section & automatic section shut-off.
- Simple cooler disassembly for easier maintenance.
- Increased capacity with smaller footprint on toolbar.
- Advanced controls for high & low end application.
- ISO Compatible.

VISIT DULTMEIER.COM FOR NEW ITEMS AND MORE SPECIALS! GOOD THRU 9/12/25

Remote Shut-Off Systems • Decals & Equipment

Use Squibb-Taylor's NH3 Remote Shut-Off Systems to improve overall safety of your NH3 storage plant. The components shown below allow you to set up a system for both manual and remote shut-off of all your N550/N551 emergency shut-off valves in (3) important ways: **1)** From a remote office or shop. **2)** From a handheld remotes carried by your plant operators **3)** From various push button stations near your storage tank (*E-Stops*). **Note: Only for NH3 Use; Do Not Use with LPG storage systems or other systems storing flammable liquids.**

RSD-E Remote Controlled Shut-Off Panel

The **RSD-E Remote Controlled Shut-Off Panel** is the main component of your complete NH3 shut-off system. It includes a built in receiver and one handheld transmitter. It is normally installed near the storage tank and includes a NEMA 4 outdoor rated enclosure. Can be located up to 300 ft. from the handheld transmitters (*through normal building walls*) and up to 400 ft. in "line of sight" with no walls.

Includes a 115V power cord with plug. It also includes a 12 volt wire harness to supply the P810 shut off devices on each N550/N551 emergency shut off valve. This 12 volt harness can also be wired to the RSD-A box (*air solenoid junction box*) for use with P539A pneumatic controlled shut off devices. 15 Amp rating will close twenty-five P810 valve shut offs simultaneously. Fail safe design provides for positive shut-off. Can be used with up to (15) RDS-E1 handheld transmitters.

HINIKER

Nitro-Lert™ for Rate Control Systems

The **Hiniker Nitro-Lert Anhydrous Ammonia Knife Monitor System** is the industry leading knife monitoring system which alerts operators to individually blocked manifold outlets, lines, or knives. Inline sensors monitor each outlet's flow variations, helping catch and correct potential application inconsistencies while also reducing downtime and overall product costs.

FEATURES:

- Monitor up to 80 individual outlets
- Detects plugged knives when operator turns flow off and on
- Signals potentially broken/blocked knives due to flow variation
- Audible system alarms alert operator to potential malfunctions
- User friendly interface — easy-to-read bar graph in-cab display monitor

Pump & Meter Units for Ag-Chemicals

**Pump & Meter Unit
for Transfer of
Ag-Chemicals & Other Liquids**

The PM2810 is an excellent pump and meter unit for transfer from bulk storage to portable containers. It is suitable for most all agricultural chemicals and herbicides. The 2" self priming **Flomax** Pump can be supplied either with a single phase or a three phase motor. The 40 GPM TCS Meter is NTEP Labeled. The register will record to 10,000 gallons. A Ticket Printer and Preset Valve are optional at added cost. Tee on pump discharge is included for "recirculation" plumbing back to tank.

The pump and meter are plumbed with iron fittings, one 1-1/2" stainless ball valve, cast iron strainer, stainless air eliminator and chemical hose. Steel stand.

Air Actuated Butterfly Valves

Keystone Series 221 Butterfly Valves with either **Keystone** or **Matryx Air Actuators**. Available in "double acting" style (air to open and close) or spring return style (air to open, spring closes when air is exhausted). Valves include cast iron bodies, EPDM seats, 316 stainless discs and 416 stainless stems. Valves are rated to 250 PSI and 250° F. **Keystone** and **Matryx** actuators are direct mount (no brackets).

DOUBLE ACTING:

Part No.	Size	Type	* NET EA.
DU A906-20K	2"	Keystone	\$ 565.00

Air Actuated Stainless Ball Valves

- 2-Piece -

These **Stainless Air Actuated Valves** incorporate a full port 2-piece stainless steel ball valve for great flow rates with minimal pressure drop. The valve features a blowout proof stem for added safety, reinforced PTFE seats and seals for longer life, and a 316 SS (ASTM CF8M) ball for better performance. Actuators are direct mounted creating a compact assembly for tight spaces.

DA Double Acting Actuator Models use an air supply to drive the valve open and closed. The actuator has two supply ports, with one driving the valve open and the other driving the valve closed.

Applications:

- Gas or Liquid Flow Control
- Ideal for Quick Bubble Tight Shut-Off

Also available with electric actuators (weather-proof or explosion-proof). Electric solenoids and limit switches.

Features: Capable of being configured to fit most any application • Vented ball to reduce operating torque • Full port design reduces the pressure drop across the valve. Rated to 1000 PSI at 250° F. and 29" vacuum • 80 PSI required to actuate.

LIQUID FERTILIZER CONTROLS & AUTOMATION SYSTEMS

**EASY
AUTOMATION
INC.**

Easy Automation, Inc. is an international supplier of automation technology to the agronomy, feed manufacturing, and grain handling industries. Founded in 1986, we have spent the last 35+ years creating innovative and practical solutions for agriculture industries.

24/7 UNATTENDED LOADOUT

24/7 unattended loadout allows trucks to pull up to a check-in kiosk, route to loadout, and start the blending process from an unattended touchscreen(s). After the load is complete, the truck can pull over a truck scale to capture a loaded weight, or receive load amount from a legal for trade mass meter, sign, and get a printed ticket. All while staying in the truck. Data is recorded and can be pulled for records.

CORE METER CONTROL PANEL

Meter control panel with core capabilities to run your fertilizer facility today, and the potential to build onto in the future. Pre-wired for easy installation, the core meter control panel is the perfect fit for a facility looking to automate their fertilizer meter system with the vision to potentially grow in the future.

SHUTTLE FILL SYSTEM

The shuttle fill system is controlled by a custom HMI screen specific to your facility. The shuttle fill system is automated to utilize either a legal for trade meter or scale system. This system allows you to repackage bulk products into shuttles, kegs, or jugs for customer pick up or inventory stocking with ease and records.

CHEMICAL WEIGH TANK

Chemical systems can be done with either meters or 250 gallon weigh tank designs. Whether you are looking for speed with a direct inject meter system or accuracy and flexibility with a weigh tank system, our customizable software and components can fit any chemical handling facility. The system can be run independently or paired with a fertilizer system to give you total control of your retail operations.

Stainless Applicator & Nurse Tanks 430 to 1800 Gallon

Constructed of type 304 stainless steel, with #4 finish. These tanks are designed and constructed to withstand the rigors of open field use. Optional equipment, such as spargers, skids, ladders etc. are available to design a custom configuration. V Sumps provide best cleanout. Mounting kits included on 1600 gallon and smaller tanks. 16" manway with 10" quick fill flip lid. 1" stainless steel sight gauge fitting and lift lugs included. **Note:** DEF Storage requires backwelding - **CALL**.

Option Equipment for 430 to 540 Gallon Tanks:

- Box sump with 2" outlet • 48" V Sump with 2" outlet recommended
- Tank baffle • 1-1/2" Stainless sparger • 2" Stainless sparger pipe
- Mild steel banded skid • Mild steel weld-on skid • Stainless steel weld-on skid • Ladders

Option Equipment for 1000 to 1800 Gallon Tanks:

- Mild steel banded skid • Mild steel weld-on skid • Stainless steel weld-on skid • 36" V Sump with 3" outlet • 96" V Sump with 3" outlet • 1-1/2" Stainless sparger pipe • 2" Stainless sparger tube • Ladders & catwalks.

Fuel Filters

Cimtek Fuel Filters remove water and foreign material from fuel before it enters the tank. All-metal construction with spin-on FPT connections designed to handle gasolines and diesel fuels across a wide range of flow rates. Ideal for general purpose farm, construction, and mobile fueling applications, as well as high-volume fueling applications like truck stops, service stations, and commercial fueling systems. Hydrosorb elements have water filtration to completely remove water and impurities from fuel. **Filter heads sold separately.**
